

Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	SWTID-2026-7510
Project Name	A CRM APPLICATION FOR THE CHAI SHOP & CO
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Formula fields are written with one IF(INCLUDES()) condition per line and uniform spacing.
2	Proper File Structure	Files and folders are logically organized	Yes	Components are grouped in Salesforce Setup: custom objects, tabs, one Lightning App, page layouts, flows, reports and dashboards.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Clear field API names such as Date_of_Birth__c, Products_Purchased__c, Order_Quantity__c and Total_Bill__c.
4	Function / Method Names	Functions are descriptively named	Yes	Descriptive rule and alert names: Check_Aadhar_Length, Verify_PAN_Format, Validate_Contact_Number, Send_Birthday_Discount_Alert.
5	Code Comments	Inline and block comments explain logic	Partial	Field descriptions and clear error messages explain the logic; inline comments in long formulas can be added.
6	Modular Design	Code is split into reusable functions/modules	Yes	Global Value Sets (Gender, Items, Payment Mode, Type of Items), phone validation rule and email alert are reused in many places.
7	No Redundant Code	Duplicate or unused code is removed	Partial	Order Quantity and Total Bill formulas are repeated on Customer and Enterprise objects; a duplicate tab and field can be removed.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Validation rules block wrong Aadhar, PAN and phone values with clear messages; the Flow runs only when Email ID is not blank.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Global Value Sets (Gender, Items, Payment Mode, Type of Items)	Salesforce Picklist Value Sets	Employer, Customer and Enterprise Account fields	High
2	Phone Number Validation Rule	Salesforce Validation Rule (formula)	Employer, Customer and Enterprise Account	High
3	Order Quantity and Total Bill formula fields	Salesforce Formula Fields	Customer and Enterprise Account, reports and dashboards	Medium
4	Birthday Email Template and Email Alert	Classic Email Template, Email Alert	Scheduled Flow; can be reused for other offers	Medium
5	Sales Reports and Dashboard	Salesforce Reports and Dashboards	Customer vs Enterprise sales analysis	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Objects, tabs, app, layouts and flows are organized clearly with consistent naming.
Readability	4	Descriptive names for fields, rules and alerts; long formulas are still easy to follow.
Reusability	4	Global Value Sets, one phone rule and shared email alert are reused.
Documentation / Comments	3	Descriptions and error messages are present; more inline comments can be added.
Overall Score	3.75 / 5	Well-structured, readable and reusable configuration; small clean-up is possible.
