Project Title	A CRM Application for TheChai Shop & Co
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	To create a customized Customer Relationship Management (CRM) system using the Salesforce platform to organize customer, employer, and company account information in one place.
Scope	To manage customer relationships, employer details, company accounts, orders, billing, reports, dashboards, and automated customer communication using Salesforce.
Problem Statement	
Description	The existing sales process relies on physical ledgers, basic spreadsheets, and fragmented offline files, making it difficult to manage customer information, calculate orders and bills accurately, and access real-time sales data.
Impact	Manual processes can lead to arithmetic errors, slow checkout, misplaced or fragmented information, delayed business reporting, and low customer engagement due to the lack of personalized communication.
Proposed Solution	
Approach	Implement a complete Salesforce-based CRM application to centralize customer, employer, and enterprise information, automate billing and order calculations, manage sales data, and support automated customer communication.
Key Features	Secure user login and identity verification. - Custom objects for customer, employer, and enterprise information.

	-Online and Walk-In customer record types. - Automatic order and invoice calculations.
