Project Name	A CRM APPLICATION FOR THE CHAI SHOP & CO
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1 Login & Access CRM	Stage 2 Customer Entry, Orders & Billing	Stage 3 Reports, Insights & Engagement
Actions <i>What does the customer do?</i>	- Staff logs in with username and password - Opens the TheChaiShop&Co Lightning app and navigates the CRM dashboard - Selects Customer, Employer or Enterprise tab	- Enters customer details (name, phone, email, DOB, address) - Selects record type (Online / Walk-In) and picks products & chai - Saves the order; total bill is generated automatically	- Opens Reports and Dashboards - Checks Online vs Walk-In sales and B2B enterprise sales - Uses insights to plan stock, offers and strategy
Touchpoint <i>What part of the service do they interact with?</i>	- Salesforce login page - CRM dashboard / home - Navigation tabs	- Customer Account form & page layouts - Order module (picklists, record types) - Billing formula fields, validation rules	- Reports (Customer Sales, B2B Enterprise Sales) - CustomerVsEnterprise Sales dashboard - Automated birthday email (Flow + email alert)
Customer Thought <i>What is the customer thinking?</i>	"Is the system secure and quick to open?" "Where do I find my customer records?" "I hope I don't need special training."	"Will I calculate the bill correctly?" "Is the customer data entered right?" "I want checkout to be fast during peak hours."	"How are today's sales going?" "Which products and customers perform best?" "Which offers will bring customers back?"
Customer Feeling <i>What is the customer feeling?</i>	Secure, in control and organized; ready to work.	Focused and productive at first; relieved and confident once billing is automatic (no manual work).	Informed and empowered; motivated to make better business decisions. Customers feel valued on receiving birthday offers.

Process Ownership <i>Who is in the lead on this?</i>	Naziya Samreen H (Team Lead) – org setup, app & navigation with Shilpa and Kinza	Sania (objects, layouts), Kowsalya (fields, validation rules), Kinza & Shilpa (record types, billing formulas)	Sania (reports), Naziya (dashboards), Kinza (birthday email Flow)
Opportunities <i>How can we improve this stage?</i>	• Add multi-factor authentication • Role-based access via profiles and permission sets • Mobile CRM access for staff	• Add more validation rules for orders • Auto-apply promo code discounts (e.g., HBDAY50) • Inventory/stock tracking for tea and biscuits	• AI-based sales prediction • WhatsApp/SMS alerts along with email • Multi-branch dashboards and customer retention reports
