

Project Executable Files

Date	29 September 2026
Team ID	SWTID-2026-7510
Project Name	A CRM Application for TheChaiShop & Co (Salesforce)
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

TheChaiShop&Co_Salesforce_CRM/	
— 01_Environment	— Salesforce Developer Edition org (Lightning Experience)
— 02_Data_Model	— Custom objects: Employer_Account__c, Customer_Account__c, Enterprise_Account__c
	— Global value sets: Gender, Items, Payment Mode, Type of Items
	— Fields and relationships (Lookup, formula fields, picklists)
— 03_User_Interface	— Custom tabs (Employer, Customer, Enterprise)
	— Lightning app: TheChaiShop&Co
	— Page layouts: Online Orders, Walk-In Orders
	— Record types: Online_Order, Walk_In_Order
— 04_Data_Quality	— Validation rules: Aadhar, PAN, Phone Number
— 05_Automation	— Birthday offer email template
	— Birthday discount email alert
	— Daily schedule-triggered birthday flow
— 06_Analytics	— Reports: Customer Account Sales, Enterprise Account Sales
	— Dashboard: CustomerVsEnterprise Sales
— 07_Docs_and_Testing	— Project documentation and README
	— Test records and validation results
	— Demo walkthrough video

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Salesforce Developer Org – Not publicly deployed
Login Credentials (Demo)	Salesforce Developer Account credentials
Platform / Hosting Provider	Salesforce Lightning Experience
Repository Link	
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites: Any modern web browser, a working internet connection and the login details of the Salesforce Developer Edition org created for this project. No software needs to be installed on the local machine.

Step 1: Open a browser and log in to the Salesforce Developer Org using the credentials provided.

Step 2: Make sure the org is using Lightning Experience, then select TheChaiShop&Co from the App Launcher.

Step 3: Use the navigation bar to open Employer Accounts, Customer Accounts and Enterprise Accounts and go through the sample records.

Step 4: Go to Setup > Object Manager and check the three custom objects, their fields, the Employer lookup and the global picklists.

Step 5: Under Customer Account, compare the two page layouts and the two record types (Online Order and Walk-In Order).

Step 6: Create a new Customer Account, choose a record type, select the products and chai, save the record, and confirm that Order Quantity and Total Bill are calculated automatically.

Step 7: Try saving a record with an incorrect Aadhar, PAN or phone number and confirm that the validation message is displayed.

Step 8: In Setup, review the birthday email template, the email alert, and the active schedule-triggered flow that sends the offer.

Step 9: From the Reports tab, run the Customer Account Sales Report and the Enterprise Account Sales Report.

Step 10: Open the CustomerVsEnterprise Sales dashboard, click Refresh, and compare the charts with the report results.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Project requires Salesforce Developer Account access	Log in using the registered Salesforce account
2	No standalone executable application	Run the project through Salesforce Lightning Experience
3	Developer Org may become inactive if not logged in for 45 days	Log in periodically; access through the Salesforce Developer Org
